

Intern - Web Platform

About Rippling

Rippling gives businesses one place to run HR, IT, and Finance. It brings together all of the workforce systems that are normally scattered across a company, like payroll, expenses, benefits, and computers. For the first time ever, you can manage and automate every part of the employee lifecycle in a single system.

Take onboarding, for example. With Rippling, you can hire a new employee anywhere in the world and set up their payroll, corporate card, computer, benefits, and even third-party apps like Slack and Microsoft 365—all within 90 seconds.

Based in San Francisco, CA, Rippling has raised \$1.4B from the world's top investors—including Kleiner Perkins, Founders Fund, Sequoia, Greenoaks, and Bedrock—and was named one of America's best startup employers by Forbes.

About the role

At Rippling, Engineering is at the heart of our business and culture. We believe in our early talent's potential, experience, and aspirations. Our mission is to open the realm of possibilities and opportunities for students by fostering growth through mentorship and training, ownership through impactful and innovative projects, and fun through our diverse culture and work hard, play harder attitude.

As an Engineering Intern, you will join one of our many teams in Summer 2025 to develop robust, well-designed products, implement new updates and features, and solve complex problems affecting our business and clients. Rippling Interns gain the experience of full-time engineers with responsibilities, ownership, and opportunity. Interns will be assigned projects that not only impact the business but are also scoped to fit within the time constraints of their internship so they can see the full impact of their work. We provide our interns with exciting and innovative projects to work on that allow them to see the fruition of their work.

During your 12-24 weeks at Rippling, we will provide all the tools needed to be successful. Your dedicated mentor and manager will support your learning and development throughout your time with us. You will join your fellow interns in various socials, talks with Rippling leaders, and more!

What you will do

- Utilize your software engineering experience to tackle important projects, solve problems, and develop quality code.
- Think critically and apply your knowledge to real-world, complex problems

- Actively participate in team meetings to scope, drive, and progress your projects
- Learn about the business, our client's needs, and the impact of your team and related projects
- Attend Meet & Greet with various executives and teams to gain a holistic view of what it takes to run a company like Rippling
- Foster relationships with your intern cohort and teams through both exclusive internship social events and company/office-wide events

What you will need

- Proficient understanding of JS fundamentals
- Knowledge of ReactJs.
- Previous internship/Co-op experience in frontend software engineering
- Currently enrolled in a Bachelor's or Master's degree in computer science or a related field with at least 1 semester/quarter after completing their internship.
- Excellent communication skills to work cross-functionally and across departments
- Solid programming skills with an emphasis on backend experience and knowledge
- Ability to adapt and ask action-oriented questions to progress
- Passion and drive to learn and develop your engineering skills constantly

About the team

UI Platform is a foundational team with the goal to push the tech, quality, and performance bar for web and mobile applications at Rippling. We build common design-system, infra, and foundations to keep Rippling's web/mobile engineers productive and efficient.
